

ER 129 Birds in Bialowieza and Biebrza marshes in may 2010

I made this birdwatching trip as a tourleader of the dutch travel agency SNP-Natuurreizen. During the stay in the Biebrza marshes we were accompanied by an excellent birdguide, Szymon Beuch.

Short description of the visited areas :

Bialowieza area : small village surrounded by forest near the border of Biela Russia. Near the village is the Palace Park, with a nice artificial lake. The Park was used by the Russian tsars. They used the surrounding forest for hunting. Behind the Palace Park is the Strict Forest Reserve where one can go only with an official guide. Human influence has been very low here. The rest of the forest is exploited commercially. This is also the place where European Bison has been released after its saving from extinction by zoos. We visited one morning the Strict Reserve, which is very good for woodpeckers. The rest of the area was explored on foot and by bike. A short visit was paid to the bridge over the Lesna river.

Siemianowka lake : second biggest lake of Poland, artificial and shallow with extensive reedbeds. We visited the southern shore during rainy conditions.

Lewsze : near Lewsze, between the Siemianowka lake and Bialystok, a short stop was made at a boggy area along the road.

Bialystok fishponds : the fishponds southeast of Bialystok were visited during one afternoon. The ponds are surrounded by dikes.

Biebrza valley : big national park of about 60.000 ha. The Biebrza is one of the last free flowing rivers in

Europe. We stayed in Woznawies and Goniadz. Near Woznawies we visited Czerwone Bagno and went by canoe on the Jegrznia river. A short visit was paid to the area around Kapice. Between Woznawies and Goniadz the Dolistowo bridge and surrounding area along the Biebrza river was visited. Birds were observed in the neighbourhood of Goniadz, Bagno Lawki, Zajki, Pulwy near Wisna, Brzostowo and Mscichly. During our visit conditions were very wet. Many areas along the Biebrza river were flooded, including some forested areas.
